Danês Factory  
Apucarana | Paraná

**BRAZILIAN  
INDUSTRY**

- 70% of our production is powered by solar energy
- State-of-the-art automated boiler system (10 tons/hour, low CO<sub>2</sub> emissions)
- Two high-capacity production lines (4,500 tons per month)
- 10,000 m<sup>2</sup> of modern industrial facilities

WE PRODUCE WITH  
**Solar energy**

Producing with environmental responsibility is a priority for everone.

We use 100% recyclable packaging

## Since 2016, we have been focused on quality and sustainable growth.

We believe that investing in technology, modern equipment, careful ingredient selection, continuous improvement, and the well-being of our employees is essential to achieving excellence.

## Quality assurance from raw material selection to distribution in Brazil and international markets.

Our success is reflected in every package, combining high-quality ingredients, advanced technology, expertise, research and development, rigorous raw material selection, continuous investment in processes and equipment, a healthy work environment, and highly qualified professionals
